Setting a New Standard for Venue Explorer

Dubai World Trade Centre (DWTC) has long been a hub for world-class events, offering a diverse range of venues that accommodate everything from large-scale international conventions and exhibitions. To better serve event organisers and visitors, DWTC set out to reimagine its digital discovery experience—moving beyond static, outdated venue listings to create a more dynamic and intuitive platform.

The result is Venue Explorer—an immersive, interactive 3D experience designed to showcase not only the full range of spaces, meeting rooms, and concourses at the DWTC complex, but also the immediate vicinity, neighborhood, and surrounding areas. Built for use on desktops and tablets to ensure the richest experience, Venue Explorer empowers users to seamlessly navigate DWTC's diverse event spaces, from expansive exhibition halls to intimate meeting rooms and lounges.

TRY THE LIVE EXPERIENCE AT:

Reinforcing DWTC's position as a dynamic, tech-forward leader in the events industry.

Through a simple, engaging interface, users can explore different venue configurations and capacities, compare spaces, and access critical information like onsite parking options, hotel proximity, and major landmarks. By putting all the essential details at their fingertips, Venue Explorer enables event planners to quickly visualise possibilities and identify the best space for their needs—accelerating decision-making and streamlining the early planning stages.

Since its launch, Venue Explorer has helped drive higher venue inquiries and faster booking turnaround times, while reinforcing DWTC's position as a dynamic, tech-forward leader in the events industry.
